

HP Latex 3000/3100/3200/3500/3600/3800

This document fills the gap between EFI XF documentation and HP Latex 3000/3100/3200/3500/3600/3800 documentation. Before you connect the printer to any computer, refer to the Installation section.

Also refer to the documentation shipped with your printer. The documents are also available in the following locations:

Installation

The printer driver supports the printers:

- HP Latex 3000/3100/3200/3500/3600/3800

Environment requirements are as follows:

- Products based on EFI XF 7.1 technology

XF Device Type	Description
HP Latex 3000	4 Colors CMYK
HP Latex 3100	4 Colors CMYK
HP Latex 3200	4 Colors CMYK
HP Latex 3500	4 Colors CMYK
HP Latex 3600	4 Colors CMYK
HP Latex 3800	4 Colors CMYK

Operation

Color Tools Settings

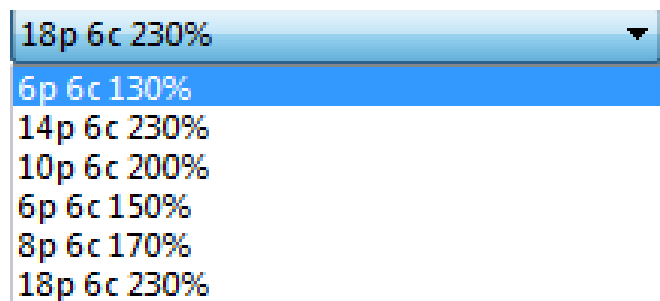

Printer settings

The HP Latex 3100/3200/3500/3600/3800 can be configured as a four-color (CMYK) printer.

Output settings

To see the New & Updated Media Type list that are Coupled with Print Modes & Resolution, we need to add the Real Printers. After the printer is added, wait for 5-7 mins. Then restart the XF Server to see the new updated Media List with their Print Modes and Resolution.

The 'Resolutions' and 'Print mode' selection are coupled. Each time a different resolution is selected the possible 'Print mode'(s) are shown below:
