Availability

- The Fiery XF 7.1.4 server update is available via an online update through Fiery Server Control for all configurations of Fiery proServer and Fiery XF version 7.1.
- Alternatively, the version 7.1.4 server update can be downloaded from the [EFI downloads area](#).

Note!

- Fiery proServer and Fiery XF solutions are made up of multiple software applications. A server application (Fiery XF server), a client application (Fiery Command WorkStation®), plus color applications (Color Profiler Option and Color Verifier Option included as part of Color Profiler Suite). Only the server application is updated as part of the 7.1.4 update, and the other software components may need to be updated to work correctly with the latest update.
- The following overview informs you about the required Fiery XF server, Fiery Command WorkStation and Color Profiler Suite versions for full support of bug fixes and features provided with Fiery XF 7.1.4:

	Fiery XF server	Fiery Command WorkStation Package	Fiery Color Profiler Suite
