Fiery XF 6.2 launch date

- 1st September 2015
  - Fiery XF - channel
    - All configurations
  - Fiery XF – inkjet solutions
    - For EFI Wide Format
    - For VUTEk
  - Fiery proServer
  - Fiery XF for Jetrion

What's new
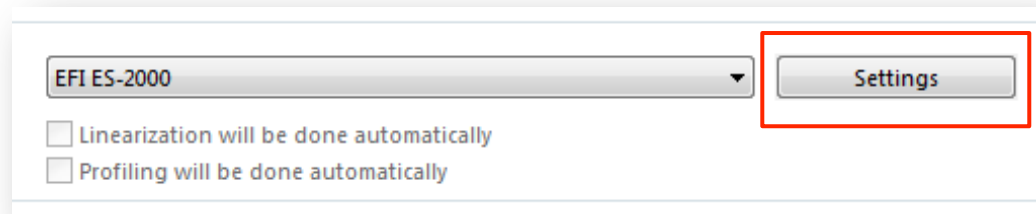

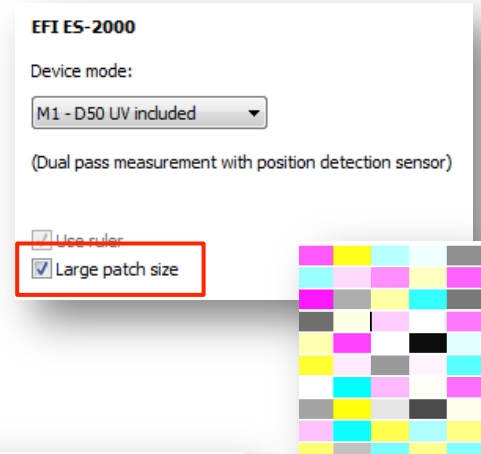

Four Fiery areas of innovation

Color

Color Profiler Option 4.7.1

- Continuity with EFI Color Profiler Suite

- Support for the new EFI ES-6000
  - M0, M1 and M2 illuminate modes

- Minor fixes and improvements

Large patch size

- For low resolution or large dot printers

- Larger patches equal additional measurements per patch

- Available for EFI ES-2000 or X-Rite i1Pro 2

- Available for linearization, profiling and optimization

EFI ES-2000
Device mode:

M1 - D50 UV included ▾

(Dual pass measurement with position detection sensor)

☑ Use ruler

☑ Large patch size

EFI ES-2000 ▾   Settings

☐ Linearization will be done automatically
☐ Profiling will be done automatically

Optimal measurements for lower resolutions and larger picoliter printers!

Color adjustment improvements

- Color adjustments can now be used on files containing spot colors

- All adjustments types can be applied

- Spot colors however are not affected

More flexible job handling, no need to tweak original files!
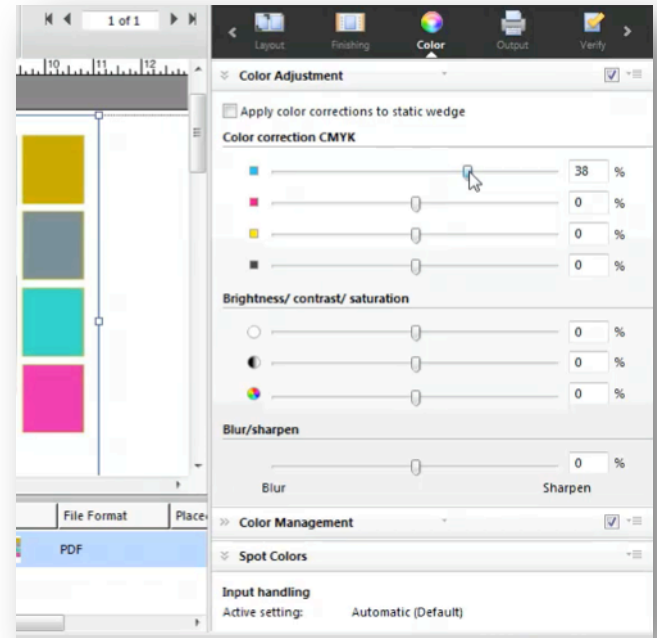

Productivity

Performance gains for VUTEk users

- Over 60% average performance increase for all VUTEk users
  - For all VUTEk printer types
  - With Fiery XF or Fiery proServer
  - For single jobs
  - At all resolutions
  - Both error diffusion and stochastic screening (SE1 & SE2)

Fastest RIP available for VUTEk printers!

Faster proServer cut path extraction

- Cut paths can now be extracted at full speed

- Applies to both single and multiple path extraction

- On both single and multi page jobs

Improved cut contour extraction

- Cut paths can now be:
  - Any spot color type
  - On any job layer position
  - Don't need to be on a separate layer
- Available for all Fiery XF and Fiery proServer users

Usability
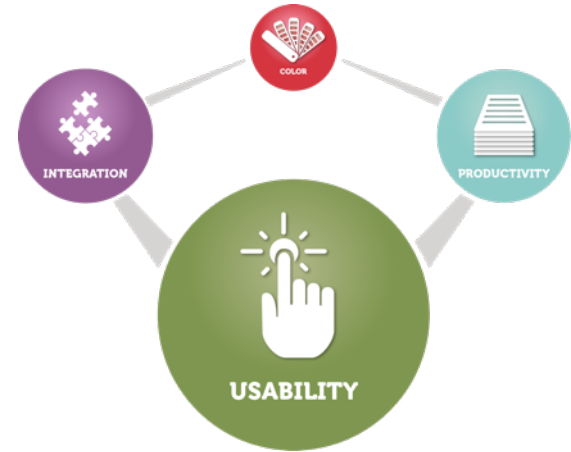

White ink support for cut & crop marks

- White ink can now be used for cut* and crop marks
- Only available for printers with white ink
- Improved mark visibility on black or dark substrates
  - *only for devices supported by our Cut Marks Option

Fool proof mark recognition for faster and more reliable finishing!
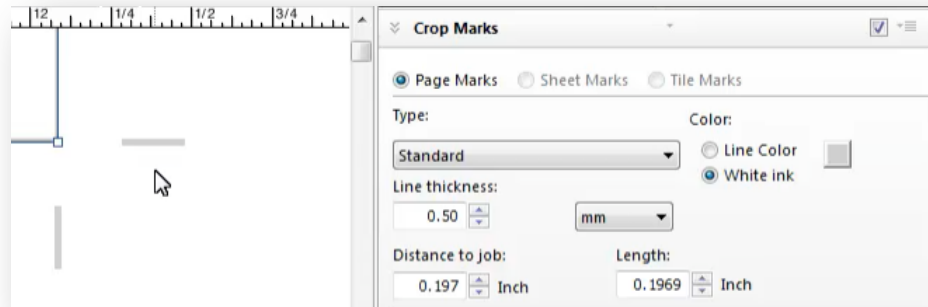

Improved cut contour options

- PDF "boxes" can now be used as a cut contour path if no cut path exists

- One of the following can now be selected as a job, or workflow setting

✓ Media box
Crop box
Bleed box
Art box
Trim box

Flexibility on file types and automatic control!

Job positioning

- Independent job positioning methods can now be used for the x and y axis

- Example: x could be centered, y positioned numerically

Quicker, easier and more accurate job positioning!
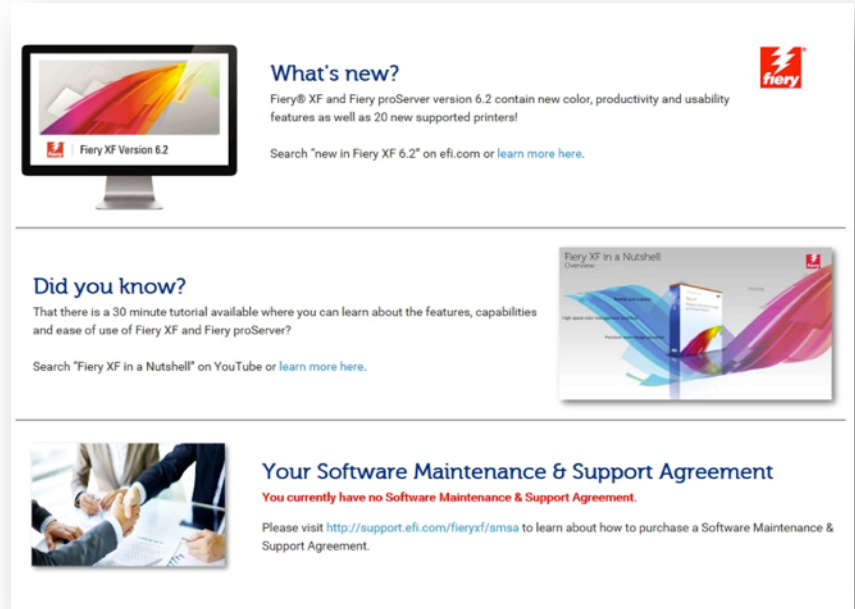

Enhanced OKI printer features

- Booklet creep function for page positioning for bound documents
  - Creep type
  - Creep paper
  - Creep factor

- No inner margin for booklets

☑ Activate creep

Creep type   Creep In ▾

Creep paper   Normal Paper ▾

Creep factor   1 ▲▼

Correct page positioning for professional results!

Welcome screen

- Important information for end-users
  - What's new?
  - Did you know?
  - SMSA status

- Displays at client launch and can be accessed from the help menu

Keep users up-to-date more easily!

Software update information

- Active information about software updates
- The server needs to be connected the Internet

- The following new cutting devices are now supported by the Cut Marks Option
  - Aristo
    - Aristomat GL,TL and LFC
  - Colex
    - SharpCut series
  - Multicam
    - MultiVision cutters
  - Zünd
    - L3 C40 and L3 C56

New printer drivers in Fiery XF 6.2

- Agfa
  - JETI Titan S
  - JETI Titan HS
- Canon
  - imagePROGRAF iPF830 RGB/CMYK Contone
  - imagePROGRAF iPF840 RGB/CMYK Contone
  - imagePROGRAF iPF850 RGB/CMYK Contone
- EFI
  - VUTEk HSr Pro
  - VUTEk HSr Pro White

- Epson
  - SureColor SC-F9200 Halftone
  - SureColor P800
- Mimaki
  - CJV150-75
  - CJV150-107
  - CJV150-130
  - CJV150-160
  - CJV300-130
  - CJV300-160
  - UJF-3042 FX (white, clear and/or primer)
  - UJF-3042 HG (white, clear and/or primer)
  - UJF-6042 (white, clear and/or primer)

Updated printer drivers in Fiery XF 6.2

- **EFI VUTEk**
  - Support for the new EFI GSLXr SuperRange ink for
    - GS3250LXr Pro
    - GS5250LXr Pro (+White)
    - GS5500LXr Pro UD (+ White)
- **EPSON**
  - New micro weaving for the CMYK Contone mode for
    - SureColor SC-S30600
    - SureColor SC-S506X0
   - SureColor SC-S706X0

OS support for Fiery XF 6.2

- Fiery XF 6.1 Server - supported operating systems
  - **Windows** - Windows 7 (64-bit), Windows 8 (64-bit), Windows 8.1 (64-bit) , Windows 2008 R2 (64-bit), Windows 2012 Servers (64-bit) Windows 10 (64-bit)
  - **Mac OS X** -10.7/8/9, 10.10
- Fiery XF 6.1 Client – supported operating systems
  - Windows - Windows 7 (32- & 64-bit), Windows 8 (32- & 64-bit), Windows 8.1 (32- & 64-bit), Windows 2012 Servers (32- & 64-bit) Windows 10 (64-bit)
  - Mac OS X - 10.7/8/9, 10.10
- Fiery proServer does not support the installation on Windows 10!!

Fiery XF 6.2 technical overview

- A Technical Overview Video for the Fiery XF and Fiery proServer 6.2 update is now available:

- https://www.youtube.com/watch?v=AhirJnghr50&feature=youtu.be

Fiery XF Version 6.2 Update
Technical Overview
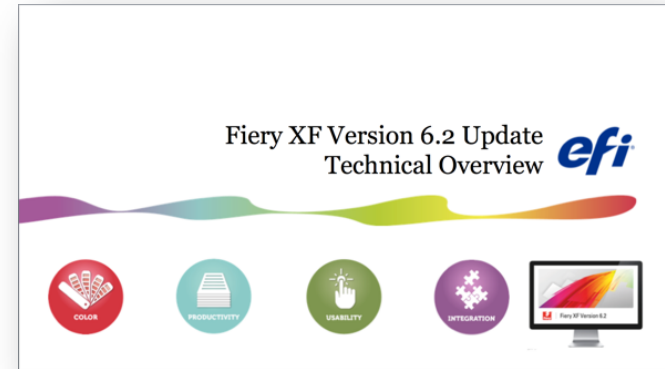

How to get to Fiery XF 6.2

- Customers running Fiery XF 6.1 or 6.1.1 can use the online updater at launch

- Customers running Fiery XF 6.0, first need to update to 6.1, then use the online updater to 6.2

- Customers with earlier version than 6, should check their EFI software maintenance status, covered customer should install 6.0, 6.1, then 6.2

- Non-maintenance agreement customer need to purchase an upgrade
  - Fiery XF, Fiery XF for VUTEk, Fiery proServer, Fiery XF for Jetrion
    - €1190/$1590/£1012 coming from Fiery XF 4-5
    - €1440/$1990/£1224 coming from Fiery XF 2-3 (no Jetrion version)
  - Fiery XF for EFI Wide Format
    - €940/$1390/£799 - coming from Fiery XF 4-5
    - €690/$990/£987 - coming from Fiery XF 2-3

Thank you
