Fiery Command WorkStation v 5.6

Service Pack 1 (SP1)

This document contains important information about this release. Be sure to provide all users with this information before proceeding with the installation.

NOTE: This document uses the term “Command WorkStation” to refer to Fiery Command WorkStation.

Fiery Command WorkStation Service Pack 1 updates the Fiery Impose/Fiery Compose plug-in to version 4.6.0.33.

The service pack has been installed if the Fiery Impose/Fiery Compose plug-in version is v4.6.0.33, as displayed in Command WorkStation Help > About Plug-in > Impose/Compose.

The following issues are resolved with Service Pack 1.

Saving PostScript files

Postscript files (with .ps extension) can now be saved correctly from Fiery Impose, Fiery Compose, and Fiery JobMaster.
