

# Customer Release Notes

## EFI Fiery Central, version 2.0.2

### Overview

This document contains important information about this release. Be sure to provide all users with this information before proceeding with the installation.

**NOTE:** The term “Fiery print controller” is used to refer to the Fiery server that is connected to the Fiery-driven printer.

Supported printers are listed at to <http://w3.efi.com/Fiery/Products/Workflow-Suite/Fiery-Central/Supported-Printers>.

### New features and issues fixed with versions 2.0.2 and 2.0.1

The following features and resolved issues are included in this software release:

- Konica Minolta bizhub PRO series printer features and improvements:
  - Jobs with Fiery Central Cover Sheet - Manual Merge print correctly.
  - Performance improvements were made when sending files with a small number of pages.
  - Large Capacity Post Inserter (PI) trays can be selected for Color Split Inline Merge jobs.
  - Performance improvements were made for jobs sent to the printer.
  - Page ranges can be specified when printing documents.
- Improved Fiery Central job processing performance for jobs imported into Hot Folders or Command WorkStation.
- Improved Fiery Central job processing performance for Mixed Media jobs with an exceedingly high number of pages.
- Fiery Central Updates are now displayed correctly in System Updates (Command WorkStation Device Center > General > Server Configuration).
- You can now send multiple small jobs simultaneously with Hot Folders to a Fiery Central server.
- Updated the technology that preflights complex files for faster spooling of files.
- Fiery JDF v1.2 includes the following improvements:
  - Automatically generated Fiery print controller-based printer finishing options
  - Improved job reporting to JDF systems
  - Improved media reporting to JDF systems
  - Improved printer state tracking for JDF systems
  - Run-list editing by operators, including editing of content files already submitted

## Update Procedures

### Before you begin

Fiery Central software 2.0 must be installed on a Windows 7 Professional 64-bit operating system along with the Fiery Central 2.0.1 Update before you can install the Fiery Central 2.0.2 Update. For more information, refer to the *EFI Fiery Central Customer Release Notes, version 2.0* and *EFI Fiery Central Customer Release Notes, version 2.0.1*.

**NOTE:** If you are updating Fiery Central software from a version prior to version 2.0, you can perform a Backup and Restore if you wish to keep the Printer Group information, Paper Catalog, and Paper Catalog mapping. For information about backing up and restoring printer groups, see Fiery Central Manager Help.

### Installing the Fiery Central 2.0.2 Update

You must apply the Fiery Central 2.0.2 Update on the Fiery Central server using one of these methods:

- Install the update using System Updates

or

- Download the update from the Fiery Central Support web page at:  
<http://w3.efi.com/en/support/overview/fiery-central>.

**NOTE:** Your Fiery Central software must be at version 2.0.1 to use Fiery Central 2.0.2 Update.

Following the installation of the Fiery Central 2.0.2 Update, you must rebuild the Printer Groups.

**IMPORTANT**

When you download and install the Fiery Central 2.0.2 Update from System Updates, the Windows 7 User Account Control (UAC) Warning dialog box prompts you to click Yes to continue the installation. If you do not click Yes, the Windows 7 UAC Warning dialog box may time out and you may need to download the update again.

---

#### TO UPDATE FROM FIERY CENTRAL VERSION 2.0.1 TO VERSION 2.0.2 USING SYSTEM UPDATES

- 1 **Launch System Updates from Start > All Programs > Fiery Central.**
- 2 **Click Check Now to check for available updates.**
- 3 **Select the Fiery Central 2.0.2 Update in the list, click Install, and then follow the on-screen instructions.**

---

#### TO UPDATE FROM FIERY CENTRAL VERSION 2.0.1 TO VERSION 2.0.2 USING THE FIERY CENTRAL WEB PAGE

- 1 **Go to <http://w3.efi.com/Fiery/Fiery-Support/download>.**

You must register before you can download the system software update and documentation. Click Submit to submit your registration information.

- 2 **Click the Application Software and Tools tab in the Download Center.**
- 3 **Select Fiery Central from the Software list, select Fiery Central v2.0 from the Version list, and click Find.**

4 **Locate EFIFieryCentral2.0.2Update.zip in the list of results and click Download.**

5 **Click Accept to agree to the terms of the license agreement.**

You must extract and save the contents to a location on the Fiery Central server before you can install the software update.

6 **Double-click the EFIFieryCentral2.0.2Update.exe and follow the on-screen instructions.**

## Rebuilding the Printer Groups

After you install the Fiery Central 2.0.2 Update, you must rebuild the Printer Groups.

---

### TO REBUILD PRINTER GROUPS

1 **Open Fiery Central Manager using one of these methods:**

**Right-click the Fiery Central Bar and select Fiery Central Manager.**

**Or, click Start > All Programs > Fiery Central > Fiery Central Manager.**

2 **Select the Printer Groups tab.**

3 **Select each Printer Group and click Edit to update the group.**

4 **Select each printer in the Selected Printers list and click the arrow button (<<) to move it to the Available Printers list, and then back to the Selected Printers list.**

5 **Repeat [step 4](#) for all printers in the Printer Group.**

6 **Click OK to save changes and to close Fiery Central Manager.**

**NOTE:** If you have more than one Printer Group, repeat steps [3](#) to [6](#).

## Localized documentation and Help

This release includes the localized *EFI Fiery Central Administrator Guide*, *EFI Fiery Central User Guide*, and online Help.

## Known Issues

The following items are known issues on Fiery Central:

- When you archive a job from the Held queue and save it to an external location, a copy of the archived job is left behind instead of getting removed from the queue.
- When you move a job from one Printer Group to another, the job may not adopt the Balance settings of the target Printer Group.
- Chapter definition settings are not applied when you set Color Split Inline Merge with subset stapling.
- The names of the output trays displayed in the Fiery Central interface do not match the names of the output trays of the printer.
- When you try to cancel several print jobs, the FieryBar does not clear the list of jobs from the print queue after cancelling all print jobs.

- The Server Preset option is not supported for Fiery Central version 2.0, but is still available from Device Center > Workflow.
- A VDP job cannot be sent from the Fiery print controller to Fiery Central using the Command WorkStation Send To command.
- Z-Fold is lost for some subset finishing ranges using specific scenarios.
- When you use Fiery Compose to create mixed subset stapling for specified page ranges, sometimes the entire print job is stapled instead of the specified page ranges.
- Installing Fiery Central on a directory other than \EFI prevents Fiery Central from fully starting up.
- For color split jobs, chapter definitions are ignored when they are applied to merged color sheets on the black-and-white printer.
- The Hold or Print queues for the Fiery Central Printer Group are not removed from the Command WorkStation Job Import user interface.
- After saving and re-opening the job, sometimes paper size settings are not saved.
- Remote Desktop connections to Fiery Central are not supported.
- Booklet Maker does not properly create booklets with non-Fiery print controllers.
- Fiery Central may list staple options with different names than those of the connected printer.
- Setup: confirmation dialog box is localized, but some text appears truncated.
- Cannot import VDP with global path search.
- Oce Prisma Sync error messages appear only in English on the FieryBar for French, Italian, German, and Spanish language versions of Fiery Central.
- Reroute on Error is supported only on the Fiery print controllers.
- If you change the language of the operating system after the Fiery Central software is installed, you must update the Printer Groups to use the native language of the operating system. For information, see [“Rebuilding the Printer Groups” on page 3](#).

## Help

### **Browser versions**

The Help files for the Fiery utilities are developed for use with Microsoft Internet Explorer v5.5 through v7.0. If you use other browsers, such as Safari or other versions of Internet Explorer, the Help might not display properly.

### **Pop-up blocker and script errors**

If your browser uses a pop-up blocker, it may block Help files. If this occurs, temporarily disable your pop-up blocker to display Help files.

If your browser has the advanced Internet option enabled to display notifications about script errors, it might display a warning window before displaying a Help file. To avoid the warning window, clear the “Display a notification about every script error” option on the Advanced tab in the Internet Options dialog box. A warning message might also appear in the Status bar, but the content of the Help file is not affected by this error.

### **Internet Explorer 8 and 9**

When you display Help files for the Fiery Central utilities, all steps start with the number “1.” To view Help files correctly, use another browser or an earlier version of Internet Explorer.
